

The Tampa Bay Fly Fishing Club www.tbffc.org

Next Meeting: Wednesday, September 3, 2008, 6:00 p.m.

Location: Compton Park Recreation Center, Tampa Palms (See below for Directions)

Special Skin Cancer Screening Dr. John Millns

John Millns loves to fly fish, but knows the dangers of too much sunshine. John graduated from Ohio State U. medical school in 1974, did internal medicine at the University of Missouri, had dermatology residency at the Mayo Clinic, then joined the faculty of USF for several years prior to going into private practice. He is clinical associate professor of dermatology at UF (Gainesville) and in private practice, doing both dermatology and dermatopathology.

John and his associates will individually examine attendees for any suspicious skin lesions. The examinations will take about three minutes for each person. All members and their guests wishing to be tested will be accommodated. Separate rooms will be set up for males and females. The examinations will be performed starting at 6:30, so come to the meeting on time. After all examinations have been completed, and if time permits, John will answer your questions on skin cancers and skin care.

Featured Fly Tyer Ron Cavalier

Ron was raised in Philadelphia and began fishing age 6. He fished the creeks, rivers and lakes for trout, bass, pickerel, walleyes and pan fish within a hundred mile radius while growing up there. He began tying flies at the age of 10. Later he fished the West and East coasts including Martha's Vineyard and Nantucket, the Bahamas' and the Cayman Islands. At one point he lost touch with fly tying and then in 1998 began tying once again. Now he ties each day, sometimes 4 hours or more a time.

This time Ron will teach us how to tie a Crab pattern that is elegant, but very easy to assemble. Ron will also show us some new tying sequences to impart special effects and to make our tying more efficient.

Directions to Our Meetings: **From I-75**--Take Bruce B. Downs exit from I-75; go west 2 miles to traffic light, turn left onto Tampa Palms Blvd., then left on Compton Drive, and right at Compton Park. **From I-275**--Take Bearss East to Bruce. B. Downs; then Bruce B. Downs east/north to Tampa Palms Blvd. Rt. on Tampa Palms, then left on Compton Drive and right at Compton Park

SEPTEMBER 2008 PRESIDENT'S MESSAGE

Hello TBFFC members,

Here it is September already, where has this year gone? Before you know it the snowbirds will be arriving.

Compton Park apologized for changing our meeting arrangements last month, but they did everything they could to help us out. In the end it was OK. We will be calling **Randy DuMars** back to give his presentation on barramundi fishing in the near future.

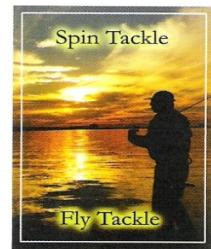

Thanks to **Layne "Smitty" Smith**, our tyer of the month for August. He tied flies the whole meeting and most of us picked up some good tips. Smitty will be tying up some flies for our banquet in March 2009, so be prepared to do some bidding.

Thanks also to **Jeff Janecek** for becoming the club's point man in Project Healing Waters, a new program to help disabled veterans learn fly fishing and fly tying. Jeff has agreed to join our Board of Directors in support of this function.

The Club wants to thank **Dr. John Millns** for the use of his cottage on Lake Calm in Odessa. We had a Fantastic outing on Sat., Aug 16th, with 16 people in attendance, **Nick Colantonio** supplied Lunch and drinks, and **Walt Durkin** also brought some drinks. I think everyone caught fish. Note also that Dr. Millns will perform skin cancer screening at our upcoming meeting.

Be sure to sign up for the Florida Sportsman Show at our Sept meeting. See details on page 3. I will talk more about this event at the meeting.

TBFFC CALENDAR OF EVENTS

2008 TBFFC MEETING DATES

Here are the meeting dates for the rest of 2008: September 3, October 1, November 5, and December 3. Please watch this space for any changes.

FLORIDA SPORTSMAN SHOW, SEPT. 27- 28

Sign up at our Sep meeting for the Florida Sportsman Show at the Fairgrounds. The event will be held on Saturday and Sunday, Sept 27th and 28th. Show hours will be 10am - 6pm on Saturday and 10am – 5 pm on Sunday. TBFFC will have a booth adjacent to the casting pond. Sign up to help for two or three hours and receive free admission to the show. While at our booth, demonstrate some fly tying and/or help teach others to fly cast, or just tell people about TBFFC. Afterwards, have some fun walking around the show.

JOIN PROJECT HEALING WATERS

Pat Damico has already arranged two pilot sessions in which some of our members have met with officials of the VA and had a chance to begin teaching disabled veterans about fly fishing. They met at James A. Haley VA Hospital in Tampa, not far from our meeting place. Additional sessions are planned for Wednesday afternoons on alternate weeks. Half of the sessions will take place preceding our regular monthly club meetings. If interested, sign up at our next meeting or contact **Jeff Janecek** at **352-588-3866**.

CARL HANSON OUTING IN OCTOBER

Our annual joint outing with the Suncoast Fly Fishers club will be held in October, most likely on Saturday the 18th. Suncoast is the host club this year, so we will wait for their scheduling. Plan to sign up at the October meeting.

BIG GUN SHOOTOUT SET FOR NOVEMBER 9

When: Sunday, November 9, 9:00 a.m. until 2:00 p.m.
Where: Picnic Island Park, (follow signs near the southern end of Westshore) We will be at the first parking area beyond the boat dock turnoffs.

What: This is an annual event in which our club hosts surrounding clubs in a friendly competition of fly-casting skills. There are five casting accuracy tests, including the infamous Hanson cup, and one distance casting test. The few contestants who manage a 100 ft. cast during the regular competition are invited to compete in the final event, a shootout for the top distance prize. Trophies are awarded for individual and team (of 3) performances and a great lunch

Judging: Please plan to do a bit of judging (which is fun), so that everyone can participate in the event. In the past, some judges were unable to compete, because nobody was available to share the judging duties.

BANQUET MOVED TO MARCH 14, 2009

We changed the date to accommodate our “snowbirds” and to allow more time for preparations.

- Instead of a guest speaker, we will have a very desirable door prize, with the lucky winner drawn from all of the attendees.

- The banquet will be held at the best restaurant of all – Alligator Bob’s. The event will be held at his home, with a great meal and all of the trimmings served on Bob’s property.
- As always, we will have an excellent selection of items in our silent auction, and a live auction with some very special objects.

All of this will be available to you for a modest fee on Saturday, **March 14, 2009**.

BILL JACKSON'S EVENTS OF INTEREST

Call (727) 576-4169 for all items listed below.

Fly casting clinics each Saturday at 10 AM

Fly Tying Clinics; 6:30 PM every Monday for beginners and every Wednesday for advanced tiers.

SUNCOAST FLY FISHERS

www.suncoastflyfishers.com

Regular Meetings: 6:30pm on the Third Thursday of each month, **except December**, at Walter Fuller Recreation Center, 7883 26th Ave. N., St. Pete.

MANGROVE COAST FLY FISHERS

www.mangrovecoastflyfishers.com

NOTE: Newer Location for MCFF Club meetings - **Twin Lakes Park**. The entrance to Twin Lakes Park in Sarasota is located on Clark Road, just 1/2 mile east of I-75, on the south (right) side of the road. Contact website above for details and directions.

TIPS FOR TBFFC – No. 3

Fly Casting Reminders

By Pat Damico

All sportsman who excel, execute fundamentals with a minimum of error. The Federation of Fly Fishers, www.fedflyfishers.org, has a booklet entitled, "The Essentials of Fly Casting." These five essentials, when properly executed will result in fly casting proficiency.

There must be a PAUSE at the end of each stroke, which varies in duration with the amount of line beyond the rod tip. When fly casting, the weight of the line, not the fly, bends or loads the rod. A pause is needed to allow the line to straighten between the backward and forward cast, thus loading the rod. Failure to do this will result in a sloppy cast.

SLACK LINE must be kept to an absolute minimum. What causes slack? Movement of the fly line by outside forces such as wind or water, starting the cast with the rod tip too high, rough, jerky application of power, and poor timing between the backward and forward cast. The belly of line that forms when the rod tip is held too high at the beginning of a cast is the most common.

In order to form the most efficient, least air resistant loops, and to direct the energy of a fly cast toward a specific target, the caster must move the rod tip in a STRAIGHT LINE PATH. The loop refers to the shape of the fly line during the cast. A tight or good loop is where the top and bottom strands of line are relatively close together. The larger the loop, the more air resistant and inefficient the cast will be, resulting in a loss of energy. If the top strand of fly line drops below the bottom strand, a tailing or crossed loop will result. This is always a fault in fly casting and causes "wind knots" in line or leader.

The SIZE OF THE CASTING ARC must vary with the length of line past the rod tip. A short line requires a narrow casting arc, a long line, necessitates a longer one. The casting arc is the angle between the rod at the beginning of the casting stroke and at the end of the stroke. The casting stroke is the movement of the hand and arm to apply power to the rod. The backward and forward movement of the rod during false casting is an example.

POWER must be applied in the proper amount at the proper place in the stroke. Power is applied slowly at first, gradually increasing to a peak at the end of the stroke. The amount of power needed for each cast is influenced by a number of factors including the amount of line to be false cast, the total length of the cast, the wind direction, the weight of the rod and line, and the type of cast to be made.

Member Photos, September 2008

Leigh West holds a Redfish he spotted while it was tailing on an 8-24-08 excursion with **Bryon Chamberlin**

Ray Cannata was all smiles after he caught this large striped bass in July off Martha's Vineyard.

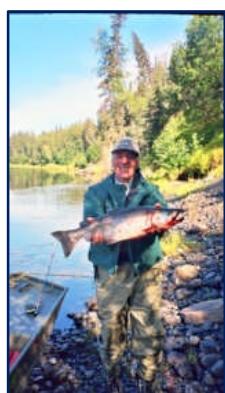

The August 16 club outing at **John Millns'** cottage was enjoyed by 15 happy club members, all of whom caught fish. The bass in the center (main picture) was one of several caught by **Jeff Janecek**. The green gurgler with the red tail "mystery" fly shown at upper left was used to catch a huge bass and several other notable sized fish. **Denise Bruner** requests that the tyer of the fly step forward and identify him- or herself. Besides catching fish, the weather was great, and Nick Colantonio prepared an outstanding lunch. (Photos by Jeff Janecek and Denise Bruner)

Member Photos, continued

Go north, young (old?) man, go north. Our members headed for Alaska *en masse* this summer. **Rick Fender** and **Nick Colantonio**, above, fished the Goodnews River and caught around 200 salmon and grayling, as sampled in these pictures. Nick won the “Comatose Angler” award for hooking fish while gazing elsewhere when they struck.

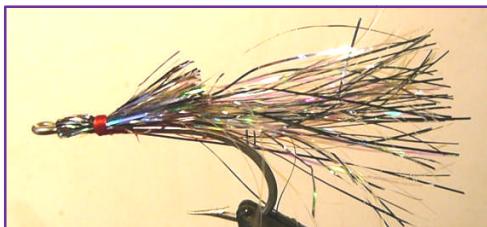

Ray Cannata (see page 5) also fished Alaska and caught these silver salmon using a 6 wt and 8 wt fly rod. He fish alone, but would enjoy company, and asks if anyone in the Tampa Bay Fly Fishing Club wants to join him next year in Alaska for silvers and rainbows.

Expect more Alaska pictures next month from another group of club members who spent a week on a float trip this summer.

FLY OF THE MONTH

Salt and Pepper Fly

As tied by Layne "Smitty" Smith

A simple fly that is deadly on seatrout and redfish

MATERIALS

Hook: Size No. 1, stainless steel

Thread: Flat waxed nylon, red.

Body and Tail: Salt and Pepper Flashabou for seatrout or red-copper-gold "three strand blend" Flashabou for redfish

TYING INSTRUCTIONS

1. Start thread approximately 1/3 shank length back from hook eye.
2. Lay a 3 1/2 inch long bundle of Flashabou on top of the hook shank so that it extends one shank length beyond the hook bend, with the opposite end extending forward of the hook eye. Bundle can be one matchstick to one pencil diameter, depending on your preference.
3. Secure Flashabou to hook shank with thread at the tie-in point and then advance the thread up to the hook eye and back to its starting point. See Figure 2.

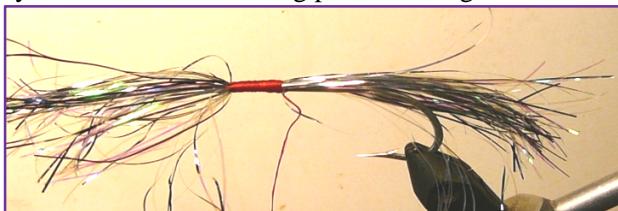

Fig. 2

4. Fold back the front of the bundle, forming a "bullet head" just behind the hook eye. Maintain a grip on the folded portion and secure with a few wraps of thread. Snip off the folded-back portion about 1/2 to 1 inch behind the tie-in point, then whip finish to complete the fly.

Fishing Report and Forecast

"What a great time to go fishing!"

Fishing was tough at the tail end of July and early August with all the rain. Some anglers fishing with Capt Rick Grassett using ultra hair clousers caught trout, bluefish, Spanish mackerel, jacks and lady fish. Fly angler Braton Machleit from TN caught several juvenile tarpons in the 10 lb range on a Grassett snook minnow fly.

Rick Fender and Nick Colantonio returned from a very successful trip to Alaska. Fishing out of the Goodnews River, Rick tells me they caught nearly 200 fish that included King Salmon, Chum Salmon, Pink Salmon, Silver Salmon, Dally Varden, Grayling and Rainbow trout. Most of the fish caught were in the 8 to 10 lbs variety. Nicks largest was a King Salmon measuring 35' and Rick's largest was a Chum that tipped the scales at 15lbs. Sounds like a fun trip.

Last Saturday was our outing at Lake Calm in Odessa. Attendance was excellent. About 20 members were there to enjoy the fishing, the eating and the fellowship. Bass and Bluegills were caught by all. I would like to thank John Millns for the use of his property and Nick Colantonio for the great lunch and to everyone involved in setting up this outing.

The month of September looks very promising. Snook season opens September 1st make sure you are aware of the new regulations. Reds will also be found in large schools this month. Look for nervous water or large wakes. A good mix of Trout, bluefish, pompano, ladyfish, jacks and more will be feeding in and around bait schools on deep grass flats. Thanks to Capt Grassett for his reports making it possible for me to write this report. Remember to always limit your kill, don't kill your limit.

Project Healing Waters Fly Fishing Updates for August, 2008

1. Wednesday, August 6, Mike Perez, Bob Gaulin, Alligator Bob Young, Jeff Janecek, Pat Damico and Leo Golembiewski met with Mary Donovan, Recreational Therapist, Debbie Gottardi, Director of Volunteers and other staff members who accompanied veterans with disabilities to a meeting at James A. Haley VA Hospital in Tampa. After a welcome by Mary and an overview of volunteer procedures by Debbie, TBFFC members explained PHWFF, answered questions about fly fishing, and then showed a VDV, 'Introduction to Fly Fishing.' Our members set up vises and demonstrated how to tie some simple spiders, wooly buggers and clouser minnows as veterans and staff asked questions. The veterans are going to be tying flies, with volunteer supervision, at our next meeting, August 20 at 3 p.m. Meetings will be scheduled at the hospital every second week, the same day and time.

Later at our regular meeting, at Compton Park, the volunteers told our membership about the experience. Additional volunteers signed up at the meeting anxious to support this very worthwhile project. It is very gratifying to see how fly fishing can impact someone's life.

PHWFF is dedicated to the physical and emotional rehabilitation of disabled active duty military personnel and veterans through fly fishing and fly tying education and outings. They provide basic fly fishing, fly casting and fly tying instruction for the wounded personnel ranging from beginners to those with prior fly fishing experience who are adapting their skills to their new abilities.

Anyone interested in becoming a volunteer can contact Jeff Janecek at 352-588-3866. If you have or know of some fly tying material, instruments, rods, and reels that are not being used, you can donate them to PHWFF.

//Pat Damico

2. I attended my second session today (August 20) of the Healing Waters Project at the VA hospital. Three enthusiastic Vets participated and each tied a couple of very nice looking flies. Mary Donovan apologized for the light attendance because some of the participants that planned to attend had a conflict because they were going to attend yesterday's hurricane-canceled ballgame tonight.

After the session, a discussion took place concerning the TBFFC meeting. Mary was very much interested in the format and content of the meeting. I'd like to suggest, if someone hasn't already done so, to add Mary's name to the e-mail distribution list of the newsletter and meeting notice. She and some of the Vets may attend our meeting.

Regards, **Leo Golembiewski**

Member Benefits

TBFFC is famous for its value and focus on the sharing of information, experience, and craftsmanship with its members. As a TBFFC member you will enjoy many benefits free or at nominal cost, plus enriching experiences.

- Monthly Meetings with Famous Speakers
- Fly Fishing Outings
- Fishing Trips Sponsored by Members and the Club
- Group Clinics and Workshops
- Fly Tying Lessons
- One-On-One Fly Casting Lessons
- Shirts and Hats with club logo
